LEARN TO FLY IN NEW ZEALAND

THE MOST SCENIC PLACE ON EARTH

COMMERCIAL PILOT LICENCE TRAINING

NTA
National Trade Academy
developing future careers

New Zealand is one of the most scenic and beautiful places on earth and is also rated as one of the safest place in the world. It has consistently topped the rank for being the least corrupt country in the world.

One of the least-known fact of New Zealand is that, it has been a pioneer in aviation and aviation training. New Zealand has a well-established aviation industry which is worth around \$17 billion per annum and more than 100 years old.

New Zealand training organisations have trained thousands of pilots over the years and pilot trained here are well respected across the globe. This has been possible by the high-quality standards maintained by the industry, the varied terrain and climatology of New Zealand.

New Zealand Airline Academy is the only fixed wing training provider in New Zealand to use touch screen glass cockpit aircraft from ab-initio training all the way to commercial licence training. These modern-day training aircraft are equipped with technology which includes four levels of terrain alerts, synthetic vision, moving map displays and traffic awareness (ADS-B in & out). Whilst the foundation of NZAAL is to provide high quality training in situational awareness and airmanship, the philosophy of the promoters is to provide the latest technology and safety features that are available in the market, so that no student ever pays with their life if they ever find themselves in a difficult situation. NZAAL is the first and only FTO in New Zealand to invest in electronic carbon monoxide detectors that provide an aural alert as well as a visual alert on the glass cockpit display.

Keeping in mind the huge growth in the field of aviation and the demand for quality pilots, NZAAL have been sub-contracted to deliver Commercial Pilot Training for International students by National Trade Academy.

NTA is Category One Provider based in Christchurch and delivers a range of education & training to a variety of sectors for both domestic and international students. NTA also has an English Language Academy for international students. (<http://nta.co.nz/>).

Benefits of training in New Zealand

- Safe Destination:** Ranks among the top 5 for being a safe and peaceful country in the world
- Very High Standards:** New Zealand trained pilots are regarded very highly around the world
- Open Airspace:** has large general aviation airspace across the country
- Fees Protection:** International student fees are protected by Public Trust which is a requirement of New Zealand Qualification Authority (NZQA)
- Code:** New Zealand Airline Academy is bound by the Code of Practice for the pastoral Care of International students through its sub-contracting agreement with the National Trade Academy

Commercial Pilot Licence Training

New Zealand Airline Academy through its sub-contracting agreement with National Trade Academy, is approved by NZQA to offer CPL training to international students. Training is delivered at our facility based out of Oamaru airport. All class rooms are well equipped with state of art technology.

Accommodation

New Zealand Airline Academy understands the need of students and offers boarding & lodging at their student accommodation in Oamaru– Aviator’s Place. All student will have their own room with attached bathroom & toilet, single bed, wardrobe, table and chair. Transport will be provided to and from the airport at fixed times.

New Zealand Airline Academy is located in the airport terminal of Oamaru Airport in the Waitaki region. Oamaru is the third largest town in the Otago region and considered a heritage town because of its more than 80 heritage buildings and the Victorian precinct is worth a visit. It is also a tourist attraction for the little blue penguin, which has an allocated area suitable for breeding and conservation. Oamaru is 3 hours drive from Christchurch International Airport or 2 hrs 30 min drive from Dunedin International Airport.
